

RAJKUMAR S

XR Developer | Unity VR | Simulation & Training Applications

+91 99623 19464 @ rajkumar977996@gmail.com

SUMMARY

XR Developer with 2+ years of hands-on experience (Apr 2023-Present) in designing and developing Unity-based VR simulations and training applications for PC VR and standalone platforms. Strong background in manufacturing and process engineering (2019-2023), enabling accurate, realistic, and validation-focused immersive experiences. Experienced with OpenXR, Oculus SDK, XR Interaction Toolkit, hardware-integrated simulators, and enterprise safety training solutions

EXPERIENCE

XR Developer

Aatral Solutions India Pvt Ltd

04/2023 - Present

- Developed VR simulation and training applications using Unity for enterprise and industrial use cases
- Built driving simulators with defect-based consequence systems and physical driving hardware integration
- Developed industrial safety training simulations for clients including JSW and TATA Power
- Implemented interactions using XR Interaction Toolkit, hand tracking, and controller input
- Delivered cross-platform solutions using OpenXR and Oculus SDK
- Optimized performance for PC VR and standalone devices

EDUCATION

B.E. - Electrical & Electronics Engineering

Anand Institute of Higher Technology

2014 - 2018

SKILLS

Unity (2022 LTS and recent versions)

C# OpenXR Oculus SDK

XR Interaction Toolkit Hand Tracking

Physics & Rigidbody

Unity UI (Canvas, TextMeshPro)

PC VR & Quest Git

PROJECTS

Driving Simulator - Defect & Consequence Training

PC VR, Oculus

- Integrated real driving hardware, defect logic, and scenario-based training feedback

Virtual Driving Simulator

US Client (Oculus)

- US driving rule-based simulation with vehicle logic and guided training flows

Saftizen - Industrial Safety Training

OpenXR & Oculus

- Work at Height, Confined Space, and Shopfloor safety modules for JSW and TATA Power

TKAP - Engine Assembly Training

Hurricane VR

- Procedural engine assembly simulation with sequence validation
